| A MANUFACTURER & DISTRIBUTOR LIKE NO OTHER

Transit launches a uniquely designed performance brake rotor line | *A Manufacturer & Distributor Like no Other*

QUEBEC CITY, CANADA (FEBRUARY 10TH, 2020) —

Transit, the largest auto parts manufacturer and distributor in Eastern Canada, launched DS-One, a new line of uniquely designed performance brake rotors.

In addition to being drilled and slotted for use on heavy-duty applications like SUVs and pickup trucks, and sought after by sports car amateurs for their look, DS-One brake discs simplify ordering and inventory management for customers stocking the brand as one number can be installed on both vehicle sides.

Stephan Guay, President, said: "It took 2 years to bring DS-One to the market because we did test after test after test to yield a high-performance product that is stylish, performs better than most OE discs and is available to our customers at the right price."

A video showing tests pitting DS-One against OE brake rotors for braking distance and braking disc temperature performances is available on Transit's website (ds-oneperformance.com).
